DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10-15, drawn to a method for the composition of a digital rights key, classified in class 380, subclass 28.
- II. Claims 16-21, drawn to a method for encoding a digital rights key, classified in class 380, subclass 259.
- III. Claims 1-9, drawn to a method for decoding a digital rights key, classified in class 707, subclass 205.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II & III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the composition of a digital rights key. Invention II has separate utility such as encoding a digital rights key. Invention III has separate utility such as decoding a digital rights key. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
